July 20, 1992

Dear Josh:

I neglected to include, on the description sent to you for strain ZIP514, the latest word on  $\Delta 74$ .

The descriptions for deletions keep changing as more detailed information becomes available. Only after they are sequenced does one know the extent of the deletion exactly.

It has now been shown that  $\Delta 74$  deleted cyn (Sung et al. 1987 J.Bacteriol.169:2639) and codA (Kilstrup et al.1987 J.Bacteriol. 171:2124).

Best wishes,

Barbara
