October 5, 1981

Barbara in Nobel
is of course excellent indeed, although
my own view is that AE/DS was
not even her most important work.

I would be glad to endorse and for-
ward a nomination that you and
Marcus prepared.

However, I am pressing for another
equally compelling candidate. My
dual success in recent years does
not support your optimism that
my Nobel carries much weight in
Stockholm these days.

Hence, I will enthusiastically
comply, as I agreed.

Yours,

[Signature]
