Dear Joshua,

RU →

Thank you for sending me the first issue of Research Profiles: it made very interesting reading and I think copies should be available in the libraries of most research institutes.

You ask for suggestions as to whom else it should be sent and the names that come immediately to mind are Christian de Duve of ICP - unless he gets it already, Nils Jerne, Otto Westphal, John Kendrew, and the present Director of the National Institute for Medical Research, Sir Arnold Burgen.

Yours very sincerely,

Peter Medawar
