Dr. Joshua Lederberg
507 Eugenia Avenue
Madison 5, Wisconsin

Dear Joshua:

We received your last communication and it covers very adequately the different areas of our discussion. It is still being digested and once this is done and work started there will be certain details I would like to go over with you.

I did not think the quality of your last record was particularly good and it might be worthwhile to have a repairman look at it. Perhaps the volume has to be adjusted for your voice. Let us know what the bill comes to and we will reimburse you. Your turntable speed also differs from mine. Since mine was checked with a strobe when the repairman was here, I assume it is your speed that is out of kilter.

Incidentally, you did not indicate to me what your expenses were when you were here. Let me know and I will adjust your next check.

I am sending you some kanamycin, novobiocin, and reproduced references and articles that might interest you. When the transcription of your records is finished, I will also forward to you a copy. Do you have any feelings about my making available the essence of our conversations or even transcriptions of your records to Bernie Davis? His fields of interest are somewhat different from yours, but he might have some interesting comments. I will not proceed in this until you assure me it is all right with you.

It was very nice seeing you again. Everybody enjoyed the session, as concentrated as it was.

Very best regards to you and Esther.

Sincerely yours,

BRISTOL LABORATORIES INC.

Joseph Lein, Director
Microbiological Research
