Dear Bill,

AIDS

I hope you are carrying the President to go ahead with the blue ribbon commission that has been proposed.

There is such a complex of moral, legal and scientific threads. E.g., not testing applicants for life insurance will defeat the system; victims will look up to the hill. Not testing hospital admissions will compromise their care. As well as the more obvious pandemic hazards. Nor may they be kept out of the campaign.

My long range nightmare is not only about the pandemic per se, but also the backlash of fear and resentment that an.Home managed epidemic will generate and will put enormous stress on our democratic system.

Sincerely,

[Signature]
