1. Testimonial — I very much enjoyed your book, and will assist in
writing my own autobiography.

2. A few questions

p. 74 Which well-known bio
cientist did you consult? I
called recently about D. W. Earn and
E. T. Washington

p. 33 Where are the anomalous peaks
c. 1924? Was there particular
attention to some particular scientific
developments just then? Other authors
in the history of a particular period?
