Personal memo from
JOSHUA LEDERBERG

Dr. Alan Campbell
S.A. Bayly

DECEMBER 28, 1970

Senator as pathogen.

Dear Alan,

Beauregard asked me to write a foreword to "The Genetic Revolution," and he sent me a copy of your chapter.

I agree with Beauregard's assessment of the book: "The Genetic Revolution." It is a synthesis of the recent advances in genetics and molecular biology.

However, I have a few concerns. I think you have neglected to mention the role of viruses in the genetic revolution. Many scientists believe that viruses play a crucial role in the evolution of life on Earth.

Furthermore, I am concerned about the ethical implications of genetic research. As scientists, we have a responsibility to ensure that our work is conducted in a responsible manner.

I look forward to the day when we can use genetic technology to improve human health and quality of life.

Best regards,

Joshua Lederberg
