Dear Arthur

I was very glad to be in touch with you again, though I have to report about 187C (most economically if not precisely) by copy of the enclosure. Between the National Cancer Panel and the Defense Science Board disaffirming fields in the shuttle to Washington is more than exhausted at this point.

But I certainly want to catch up with you and UVA. I saw Jim lightly before he was named as deputy for the modest things, and he mentioned your work.

You were at work. I called just now before this note. Perhaps we can have 1 or 2 hours at least a what time you get back.

Sincerely,

Joshua Lederberg
President
