Dear Eggie: Genealogia, etc.  

Sounds like a tremendous and very useful undertaking!  

But besides this reference book, why don't you write your own or giving something a person could read from cover to cover; that outlines the philosophy you use in problem-solving; and with chapters from birth to death illustrated by your experience. What to do with conflicting advice could be the most interesting.  

P.S. I'll do it. Some reference is needed.  

P.P.S. - Why have someone in mind? (purchase reference.)
