Dear Josh:

I do not know what your commuting schedule is between California and New York. Should you be in New York on Wednesday, April 26th we would be most pleased if you could attend one of our major annual lectures, the Solomon A. Berson Memorial Lecture. This is to be given this year by Roger Guillemin on the subject of "current studies on endorphins". The lecture will take place from 4-5 PM that day with a reception following. If you are able to come I will send you more detailed instructions. —It is hard to believe that my son was just accepted to a combined MD/PhD program at Stanford, though I am not sure that this is what he actually wants. He plans to take off the year before starting in any event and may decide to stay East at Harvard instead.

I am looking forward to hearing from you.

With best regards.

Sincerely yours,

*Dorothy*

Dorothy T. Krieger, M.D.  
Professor of Medicine

Director, Division of  
Endocrinology & Metabolism

*give Berson in 79  
no.  
maybe 80 if  
quiet*

I will certainly make an effort; (though I am not sure Roger will welcome me after our discourse here on Claude Bernard -- where I thought Bernard was the unsung hero of the style of the modern scientific paper: which pretends to a 'method' of discovery that is usually fabricated after the fact.) I have a lecture of my own from 2-330, and a dinner engagement; so this is perhaps BARELY possible. But if it is, I don't want to miss a chance to renew connects.

Yours,

*Joshua*
