NATIONAL RESEARCH COUNCIL
OF THE UNITED STATES OF AMERICA

SPACE SCIENCE BOARD

March 14, 1960

Dr. Joshua Lederberg
Department of Genetics
Stanford University
Palo Alto, California

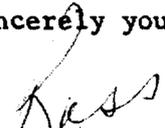

Dear Josh:

I enclose for your information a copy of a letter to Academician Blagonravov from Dr. Porter concerning the possibility of your meeting with Soviet colleagues in London to discuss biological sterilization of space vehicles. I am very sorry to say that this letter only went out last Friday. Dr. Porter was most prompt in following up earlier discussions with Blagonravov concerning the possibility of this meeting. Unfortunately he sent the letter to this office for review before mailing and it has been lost for almost a month among our papers.

I deeply regret this delay but I hope that arrangements are still possible for your meeting with the Soviet scientists.

With best regards,

Sincerely yours,

R. C. Peavey
Secretary

Enclosure
