Suechinsk

I keep hearing interesting fragments from Jehova Hoptim and I have just been through a large pile of USSR publications. Do you wish to discuss any further?

Will there be a UN investigation?
In the past, multiple cases of the visceral form of Siberian ulcer were often observed because of the slaughter of cattle on the farm and the unprofessional processing of meat at small enterprises [11]. However, a large portion of the flareups and especially of family infections has remained undescribed, and information about them has been preserved only in the files.

Skin, intestinal, pulmonary and septic forms have been described in man until recent times. It is considered that any clinical form of the disease can be complicated by Siberian ulcer sepsis, and separation of the primary intestinal and pulmonary forms is acknowledged to be provisional. Therefore it has been proposed that, along with the skin, only the septic (visceral) form of Siberian ulcer be distinguished.
