Dear Ogden

You must stay a few days on your way to N. Y. I shall have much more of interest to show you than on your last visit. I am very busy at the cerebral palsies of children, working up on Infirmary material. Shall give three lectures this spring. Gowers has rather got ahead of me in his chapters which are the only ones of importance in the language. Curious that the subject should have been so much neglected. I am writing on epilepsy chorea & the spastic palsies for K. Will you not report those cases of Polioencephalitis? I wish you would send your comm. to one of your journals. It helps you & them. Mrs. F. & chicks all well. I shall spend the summer quietly at home.

Let me know when to expect you.

Sincerely yours,
Wm. Osler.

*All remaining papers available volume and sent in the Notes and Comments for Puss's journal
Use special of it.*
