Oct. 19, 1979

Dear Dr Swan:

Once again our anniversary has rolled around, but this is a ~~big~~ one. It is 25 years today since my surgery. Sometimes it seems like it was only a couple of years ago but then I think of all the wonderful living and the full life that is crammed into the years and it seems like far more then 25 years.

For the first time I can't say that I am doing fine and have no problems. Last spring I started having some hypertension. I was put on Dyazide and my B.P. was pretty well controlled. I really had no problem until Aug 30th when I experienced some chest pain and nausea, which I didn't associate with my heart. It felt like my clothes were too tight and I definately have put on weight through the years. I felt fine the next morning and went on to work as usual. Shortly after lunch I had the same pain only much more severe. Since I am secretary for the emergency room doctors went to E.R. and before I knew it I was in C.C.U. Dr Richter suggested

you might be interested in what actually happened, so I ask my doctor (Dr Stephen Paskos) for a copy of my records, which are enclosed. Dr Richter said he would be interest in your opinion as to whether the enlarged R ventrical has any connection with what happened. I have been home resting for 7 weeks and feel pretty good once again Monday I am starting back to work 4 hours a day. I don't have any chest pain or pressure, but do still get an occasional head ache from the Nitrol bid paste.

Dr Richter is retired now but we keep in touch, and I still rely on his advise. He ask to be remembered to you, and was interested in hearing what you are doing these days. Also, we both would like to be remembered to Dr Blount

Although I have been slowed down recently, I feel its still a great life, and I have been blessed with a wonderful family, with 5 of the greatest grandchildren. I still travel a ~~bit~~ lot, and will be happy to get back to my job.

I look forward to hearing from you and what's new in your life.

First I thank the good Lord, then secondly you for the past 25 years!

Affectionately,

Clarabell Presley
