TO

Congressman John E. Fogarty's bill calling for a White House Conference on Aging was reported out of Education and Labor Committee today. Congressman Roy W. Wier, Chairman of Subcommittee which considered the FOGARTY bill stated that this bill was one of twenty-one other bills which came before the subcommittee but was the only one receiving committee approval. The FOGARTY bill provides for holding preliminary conferences on aging within each of the States to be followed by a White House Conference to be held by September 30, 1960. Mr. Fogarty considers the chances of getting action on his bill to be good because of the terrific interest of civic organizations and other interested groups in the States.
