MEMORANDUM

TO: Dr. Art Robinson

FROM: Linus Pauling

Dear Art:

Here is a draft of my paper on Orthomolecular Psychiatry (incomplete). The paper continues with a section with a section Glutamic Acid, Nicotinic Acid, and Other Substances, and then a section on Localized Cerebral Deficiency Diseases, a draft of which is also attached.

Please let me know about any parts of the paper that cause you any difficulty; that is, I mean any parts that you think the ordinary reader of Science would have difficulty in understanding.

Some of the drawings are being made now. I shall ask Mrs. Junkermann to give you Xerox copies of them when they become available.

Linus Pauling
