Attached draft for Bureau pamphlet.

I strongly advise against publication of any nonsense like this.

a. All Bureau legislation - manpower - CHP - Hill-Burton
   BMP - is currently under consideration and Congress

b. Endicott has stated publicly that he intends to form
   a new Bureau if legislation passes

c. BMP is still officially
   w/ BHSR

d. The introduction is written
   in such a way that one
   would think the entire
   Bureau consists of manpower
   activities. Development, planning,
   construction are brushed off

e. The paragraph on BMP
   was written by me for a
   functional statement that was
   needed during the initial
   period. It is no longer
   accurate and publication would
   be contrary to Council Order
