NEW FILE BEGINS

Doc # 2
March 21, 1968

Director, NIH
Through: Deputy Director, NIH

Associate Director, NIH, and Director
Division of Regional Medical Programs

Resume Report of any grant where funds to be awarded for any one
two.00,000, exclusive of new construction or alteration,
operation, or repair funds

At its meeting on February 26-27, 1968, the National Advisory Council on
Regional Medical Programs recommended that the applications listed below
be approved. The Division of Regional Medical Programs intends to proceed
with the activation of these grants after carrying out the instructions of
the Council as described below:

PLANNING SUPPLEMENTS

3 GO2 RM 00031-0261 and 5 GO2 RM 00031-02, Metropolitan Washington, D.C.

The Council recommends approval of the planning supplement for the time
and in the amount requested of $256,069 for one year, with advice that
staff competence be broadened beyond clinical fields to include educational
and administrative competence; award additional $35,163 for direct costs
from unexpended funds.

The Council felt that experience during the first planning year has
demonstrated that the original projection of staff needs was unrealistic
and that coordinators are needed in each of the participating universities,
the Health Department of the District of Columbia, and the Hospital Council
of the National Capital Area. The Council shared the Review Committee's
concern that the proposed staff competence does not extend beyond clinical
fields.

3 GO2 RM 00048-0261, Maryland

The Council recommends approval in the time (one year) and amount requested
of $328,700.

It was the consensus of the Council that this supplemental planning request
is worthy of support. The epidemiology and statistics center, as well as
the stroke components of this application, were felt to hold particular
promise as Regional Medical Program activities. The opinion was expressed
that the center may well serve to meet broader needs. Although the proposed
components in general appear to have university orientation, there was
agreement that this region is taking initiative in specific areas where there
are existing strengths in personnel and facility resources. Planning grant
funds may not be used for alterations and renovations.

NEW OPERATIONAL

1 GO3 EM 00006-01, North Carolina

Approval in the time and amount requested, conditioned upon reduction of the amount of compensation to be allowed for physician trainees in the Continuation Education in Internal Medicine project to stipends of $1,500 per month.

Council members agreed that this was a well-conceived application which would consolidate planning activities and operational projects into one grant. Although several of the proposals are not directly related to the categorical diseases, they reflect regionwide cooperation in meeting locally developed priorities for health care resources.

Consideration of the individual projects was generally favorable and followed recommendations of the Review Committee.

The amounts requested are: $1,200,916, first year; $1,317,129, second year; and $1,164,203, third year, plus appropriate indirect costs.

1 GO3 EM 00031-01, Metropolitan Washington, D.C.

The Council recommends conditional approval for approximately $363,000 to support projects one and two for the time and amount requested; project three to be supported for two years only at a reduced level of approximately $66,902. No funds are to be awarded for project four.

The four projects included in this application are as follows:

1. Freedman's Hospital Stroke Station. (The Council recommended that funds earmarked for stroke detection and care be used to support this project);

2. Cerebrovascular Disease Follow-up and Surveillance System;

3. Training Program for Cardiovascular Technicians;

4. Home Telecasts of Medical-Surgical Conferences.

The amounts requested are: $599,476, first year; $296,315, second year; and $158,447, third year, plus appropriate indirect costs.

OPERATIONAL SUPPLEMENT

3 GO3 EM 00002-0161, Kansas

The Council recommends conditional approval of all five components of this
application, subject to a Council site visit to obtain further clarification, and to determine the amount to be awarded.

The five components included in this application are:

1. Continuing Education for Cardiac Care;
2. Metropolitan Kansas City Nurse Re-Training Program;
3. Health Data Bank;
4. Self-Instructional Centers;

In general, the Council felt that this was a well planned group of projects which are worthy of support.

The amounts requested are: $397,710, first year; $270,923, second year; and $248,887, third year, plus appropriate indirect costs.

It is the intention of this Division to activate these grants.
