DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

National Institutes of Health
Division of Regional Medical Programs

National Advisory Council on Regional Medical Programs

Minutes of Meeting
November 20-21, 1967

National Institutes of Health
Conference Room "C"
Stone House
The National Advisory Council on Regional Medical Programs convened for its tenth meeting at 8:45 a.m., on Monday, November 20, 1967, in Conference Room "C", Stone House, National Institutes of Health, Bethesda, Maryland. Dr. Robert Q. Marston, Associate Director, NIH, and Director, Division of Regional Medical Programs, presided for Dr. William H. Stewart, Surgeon General, who was unable to be present at the meeting.

The Council members present were:

Dr. Leonidas H. Berry
Dr. Michael E. DeBakey
Dr. Bruce W. Everist
Dr. John R. Hogness
Dr. James T. Howell

Dr. Clark H. Millikan
Dr. Edmund D. Pellegrino
Dr. Alfred M. Popma
Dr. Mack I. Shanhoitz
Dr. Cornelius H. Traeger

The Council member absent was:

Dr. George E. Moore

Public Health Service members attending some of the sessions included:

Dr. Stuart M. Sessoms, Deputy Director, NIH
Dr. S.M. Fox, National Center for Chronic Disease Control
Bureau of Disease Prevention and Environmental Control
Dr. Wilfred David, National Center for Chronic Disease Control
Bureau of Disease Prevention and Environmental Control
Dr. Burnet Davis, National Library of Medicine
Dr. E.P. Offutt, Office of the Surgeon General

1/ Proceedings of meetings are restricted unless cleared by the Office of the Surgeon General. The restriction relates to all material submitted for discussion at the meetings, the agenda for the meetings, the supplemental material, and all other official documents.

2/ For the record, it is noted that members absent themselves from the meeting when the Council is discussing applications: (a) from their respective institutions, or (b) in which a conflict of interest might occur. This procedure does not, of course, apply to en bloc actions—only when the application is under individual discussion.
Liaison members attending:

Dr. Sidney Farber, NCI Council
Dr. A. Earl Walker, NINDB Council

Others Attending:

Dr. P.C. Anderson, NIH-OD
Dr. Lionel M. Bernstein, Veterans Administration
Dr. J.H.U. Brown, NIH-NIGMS
Dr. Richard Chapman, NIH-DRG
Mr. Frank Ehrlich, NIH-FMB
Mr. John Francis, Bureau of the Budget
Mr. James Gregg, NIH-OD
Mr. Lawrence Maxey, NIH-OD
Dr. Ian Mitchell, NIH-NCI

DRMP Staff:

Mr. Stephen Ackerman, Associate Director for Planning & Evaluation
Mr. James Beattie, Chief, Grants Management Branch
Mr. Edward Friedlander, Assistant to Director for Communications and Public Information
Mrs. Eva M. Handal, Committee Management Officer
Mr. James Lawrence, Financial Management Officer
Dr. Richard G. Manegold, Associate Director for Program Development and Research
Mr. Maurice E. Odoroff, Assistant to Director for Health Data
Mr. Roland Peterson, Chief, Planning Branch
Mrs. Martha Phillips, Chief, Grants Review Branch
Dr. A. M. Schmidt, Chief, Continuing Education and Training Branch
Dr. Margaret Sloan, Associate Director for Organizational Liaison
Dr. Richard Stephenson, Associate Director for Operations
Mr. Karl Yordy, Deputy Director
Miss Rhoda Abrams, Planning and Evaluation Branch
Mr. Ira N. Alpert, Office for Operations
Mr. Robert Anderson, Office for Operations
Miss Sheila Beach, Committee Management Office
Dr. Phyllis Carnes, Continuing Education Branch
Mr. Peter Clepper, Grants Review Branch
Miss Cecelia Conrath, Continuing Education Branch
Dr. V.J. Corollo, Office for Operations
Mr. A.E. Curry, Grants Management Branch
Miss Judy Fleisher, Communication and Public Information Office
Mr. Donald Fox, Grants Management Branch
Mrs. Elizabeth Fuller, Office of the Director
Mrs. M.V. Geisbert, Planning and Evaluation Branch
Mr. LeRoy Goldman, Office of the Director
Dr. John Hamilton, Office for Operations
Mr. Arthur Hiatt, Planning and Evaluation
Dr. Frank Husted, Continuing Education Branch
Mr. Robert Jones, Grants Review Branch
Mr. Frank Karel, Communications and Public Information Office
Dr. Philip Klieger, Office for Operations
Mrs. Lorraine Kyttle, Grants Review Branch
I. CALL TO ORDER AND OPENING REMARKS

Doctor Marston called the meeting to order at 8:45 a.m.

II. ANNOUNCEMENTS

Doctor Marston made general announcements about the Service Desk, and called attention to the statements on, "Conflict of Interest," and "Confidentiality of Meetings." He announced that there would be an Executive Meeting of the Council and Liaison Council Members at noon today. Dr. Stuart M. Sessoms, Deputy Director, NIH, will attend the meeting.

Mr. Charles J. Hitch, Vice President of the University for Administration, University of California, has resigned as a member of the Council because of his appointment as President of the University of California, January 1, 1968.

Dr. Edwin L. Crosby, Director, American Hospital Association, was welcomed as an observer to the meeting. He will become a member of the Council effective December 1, 1967.

Dr. Sidney Farber, Director of Research, Children's Cancer Research Foundation, is replacing Dr. Murray M. Copeland as the liaison member from the National Advisory Cancer Council. Doctor Farber served in this capacity previously.

III. CONSIDERATION OF FUTURE MEETING DATES

The Council reaffirmed the following dates for future meetings:

- February 26-27, 1968
- May 27-28, 1968
- August 26-27, 1968
- November 25-26, 1968

All of the above will be held in Conference Room 4, Building 31, beginning at 8:30 a.m.

IV. CONSIDERATION OF MINUTES OF AUGUST 1967 MEETING

The Council unanimously recommended approval of the Minutes of the August 28-29, 1967, meeting as written.
V. COMMENTS FROM LIAISON MEMBERS

Doctor Walker mentioned a discussion which was held by the National Advisory Council on Neurological Diseases and Blindness concerning the overlapping activities of the NINDB general program and the DRMP. The main discussion had to do with cerebrovascular diseases. For about ten years the NINDB has had a project program of clinical cerebrovascular research centers and at the present time there are approximately eighteen such centers around the country that are carrying out clinical investigations in this field. There have been a number of applications from other parts of the country for similar centers.

It has become apparent to the NINDB Council that some of these centers which are now in operation are located in areas where DRMP has either planning or operational grants, but there has been no real contact between these centers and the RMP. It is believed that if the regional medical programs could utilize some of the background of these centers it would enable the regional medical program to disseminate to the community some of the research of the clinical centers and be used for some of the service activities of the regional medical program.

In at least two areas of the country there are operational grants that do not include or have any real integration with clinical research centers in those areas. The NINDB Council believes that perhaps the DRMP project site visitors going into these areas might look into better integration between the clinical research center currently established and the RMP programs.

VI. REPORT ON APPLICATION WHICH WERE CONSIDERED AT THE AUGUST 1967 COUNCIL MEETING

AWARDED

VII. LEGISLATIVE PROPOSAL

One of the major purposes of the Surgeon General's Report to the President and the Congress was to provide the basis for legislation extending this program and making whatever modifications seem to be
necessary on the basis of the initial experience. A legislative proposal was submitted by the Division to implement the Report. The over-all outlines of that proposal are indicated in the specific recommendations of the Report. The specific recommendations concern the extension of the legislation and the need to authorize the use of RMP grant funds for new construction of facilities to meet regional needs within specific constraints. New authority would also allow for direct support of activities meeting the needs of more than one region.

Two technical amendments were also proposed in the Report. The first is the addition of practicing dentists to that provision of the legislation which says that patients whose cost of care will be paid out of the RMP grant will have to be referred by a practicing physician. The oral surgeons have pressed for this amendment. The other technical amendment concerns modification of our legislation to permit the active involvement of Federal hospitals in RMP activities. There is some question about this item because new legislation which provides that Public Health Service grants for research training or demonstration can be awarded to Federal hospitals. The General Counsel's Office has been asked for an opinion on the applicability of this new legislative provision to RMP grants.

VIII. ANTICIPATED WORKLOAD FOR THE REVIEW OF GRANTS

It is anticipated that the workload for future Council meetings will be so heavy, due to the increase in the number of operational applications, that it may become necessary to increase the time of the Council meetings to at least 2 1/2 days and continue to have at least four meetings a year. We are planning to increase the number of Committee members and may divide the Committee into sections A and B.

IX. EXECUTIVE SESSION

The Council, Liaison Council members, Deputy Director, NIH, and certain DRMP staff members met in Executive session with Doctor Marston from 12:00-2:00 on November 20-21. Among the subjects discussed were, "Reorganization of the Division of Regional Medical Programs," and additional discussion of the, "Legislative Proposal."

X. ANALYSIS OF THE CURRENT NATURE OF THE REGIONAL MEDICAL PROGRAMS

Mr. Ackerman discussed the, "restatement of Regional Medical Programs," and indicated that it was needed because of the divergence of views and opinions at all levels concerning the scope and purposes of the program, and the lack of adequate attention to certain aspects of the program due to the early push to get RMP off the ground.

Because of the above, there exists a need for increased Division guidance concerning the scope and purposes of the legislation within which the Regions may exercise their own initiative.
The following are policy issues which can be elaborated upon:

A. **Focus on the Patient:**

1. **Quality versus quantity**—"the evolution of a system that will make available to the bulk of the population medical services that are excellent in quality and adequate in quantity."

2. **Program balance**—
   a. Categorical balance (heart disease, cancer, stroke);
   b. Program function (research, training, continuing education, demonstrations of patient care);
   c. Disease process (prevention, diagnosis, treatment and rehabilitation);
   d. Institutions and resources (practicing physicians, university, hospital, public health, voluntary, consumer).

B. **Regionalization:**

1. **Cooperative Arrangements**
   a. Local and broadly-based decision making;
   b. Contributing to systems of health care.

2. **Relationship of RMP to other governmental programs.**

3. **Sub-regionalization and interregional relationships.**

C. **Other Issues:**

1. **Self-monitoring aspects** of the program, i.e., planning and evaluation as on-going activities.

2. **The non-interference clause in P.L. 89-239.**

3. **Categorical nature of the program vs. the need for comprehensive care.**

4. **The transmission of program priorities to the Regions.**

The following are proposed courses of action which are available to us:

1. **The January meeting** offers a national forum for spotlighting these issues.

2. **The revision of the Guidelines** gives a timely opportunity for restatement and clarification of fundamental policies.

3. **Special staff assistance** can be given to regions particularly in connection with metropolitan programs and categorical emphasis areas.
4. **Special communications efforts** can be undertaken with some pertinent areas including the development of monographs by appropriate experts and by regional or inter-regional workshops.

5. The **review process site visit and progress report** protocols can be structured so as to assure that adequate attention is being given to these fundamental policies.

**XI. DRMP GUIDELINES; AND, THE JANUARY CONFERENCE-WORKSHOP ON REGIONAL MEDICAL PROGRAMS**

Mr. Robert Lindee, Assistant Dean, School of Medicine, Stanford University, has been working with the Division on a revision of the **Guidelines**. Mr. Lindee's contribution to this effort has enabled the revision to benefit from the perspective of the nonfederal institution that has to work with guidelines for Federal programs. The Division believes that a revision of the Guidelines is needed to benefit from base of experience that was not available at the time the original guidelines were drafted. This is a crucial time in the development of Regional Medical Programs because so many regions have reached the point when they are about to enter into the operational grant phase. It is important that the revised guidelines be available during this vital period. Therefore, the Division believes that revised guidelines should be issued in the near future even though new legislation will be proposed next year. (Subsequently, a Council Sub-Committee, consisting of Drs. Millikan, Chairman, Crosby, Everist, and Pellegrino, was appointed. As one of its first responsibilities, the subcommittee will meet with the staff to review the revised Guidelines.)

Plans are proceeding for the Conference-Workshop on Regional Medical Programs, which will be held at the Washington Hilton Hotel, January 17-19, 1968. The theme for the Conference is, "Issues for Regional Medical Programs in the Improvement of Health Care." Mr. Lindee and Dr. John Gronvall, Associate Director and Associate Dean, University of Mississippi Medical Center, are Co-Chairmen of the Conference.

**XII. REPORT ON ACTIVITIES OF URBAN AFFAIRS AND THE RELATIONSHIP TO CATEGORICAL PROGRAMS**

At the Executive Meeting of the Council in August a discussion was held concerning the Regional Medical Programs with metropolitan areas and the related urban health problem. The Council issued a statement which recognized the complexities of the urban environment but stressed the responsibility of the RMP to contribute to health efforts there. It also recommended that the Division of Regional Medical Programs call together appropriate National leaders to consider how the attention of the RMP can best be focused on the urban health issues in metropolitan areas and their inner cities.

Subsequently, on November 16, a meeting was held to discuss ways
which the RMP can effectively contribute to the solution of these problems. The discussion centered around the nature of Regional Medical Programs and their relevance to the problems, suggestions for types of action, and description of types of projects that might be developed in regions. The meeting was more diagnostic than therapeutic, but it should help orient future RMP activities in this vital area. The consumer group and the community hospital need to have representation in the discussion of this important problem.

CONSIDERATION OF GRANT APPLICATIONS

1 G02 RM 00063-01, Northwestern Ohio (Toledo)

The Council recommends approval in the amount and time requested of $274,450 first year, and $271,137, second year plus appropriate indirect costs.

Council was satisfied that a vast amount of planning had preceded this application. The high level of cooperation achieved in the region was noted, with special mention that financial assistance had been provided by the Heart Association. Since the medical college with which the Region will be affiliated is a developing one, Council stated that this is a unique opportunity for the medical college and regional program to develop together. Information was provided that the Program Coordinator has recently arranged to work with the Program on a full-time basis. With that problem resolved, the Council was favorably impressed with the proposal.

1 G02 RM 00064-01, Northwestern Ohio (Cleveland)

There was consensus that this planning proposal is reasonable in scope, size, and socio-economic characteristics, with the to be expected encumbent urban complexities. It shows great promise of success in that pre-planning has been underway for sufficient time to allow for the formulation of a well-organized plan, and also it comes from a region rich in talent and medical resources.

The evidence of involvement of urban and suburban peripheral interests to the Cleveland area could be stronger, but it was recognized that this is a common weakness of most planning applications. A strengthening of lay participation from the outlying areas would improve this aspect.

The overlapping in state licensing practices was felt to be a potential strength for inter-regional cooperative efforts.

The Council recommends approval in the amounts and time requested of $280,690 and $279,655 for an additional year, plus appropriate indirect costs.
2 G02 RM 00035-02, South Carolina

This is a competing application for a second year planning grant. The initial planning award was made for one year only. Discussion of the application was brief. Major concern was expressed about the absence of a permanent director. Reluctance of practicing physicians in the Region to cooperate was also mentioned. The possibility was suggested that the Regional Program has realized more progress than is evident in this application.

The Council recommends approval in the amounts and time requested of $316,675, first year, and $147,500 second year (six months), plus appropriate indirect costs.

3 G02 RM 00013-0251, Western New York (Buffalo)

The Council recommends conditional approval in principle of all three components of this application subject to a Council site visit to (a) identify fundable planning aspects of each activity and (b) determine the amount to be awarded.

The amounts requested were: $285,194 first year; $177,282 second year; and $180,243 third year, plus appropriate indirect costs.

3 G02 RM 00023-0251, Oklahoma

The Council recommends approval in the amounts and time requested of $112,849 first year (nine months), and $310,881 second year, plus appropriate indirect costs.

Council expressed great interest in this application which will provide funds for supplementary planning activities for this Regional Medical Program. It defines needs which were not anticipated originally and proposes an imaginative approach to their solution. It also provides for the extension of the committed program period for one additional year.

Some concern was expressed relative to the region's slowness in recruiting a permanent full-time coordinator. It was felt that although the present acting coordinator is devoting his full attention to the program, it is unlikely that the region will move smoothly into a full-fledged operational program until a permanent person is found.

1 G03 RM 00018-01, Tennessee Mid-South

The Council recommends approval in the amount of $1.5-million direct costs for the first year, and at the same level, less nonrecurring costs, for the additional year of the program period.

The final decision on the recommended dollar amount was based, not only on the total of the "approved" projects, but on a general agreement that the $1.5-million will provide for an adequate program base upon which the Region may build.

The Council was satisfied that the Region has the mechanisms available for an operation program. Special mention was made of
the intercommunity and interracial cooperation evident in the application. Shortcomings in the program are the absence of stroke projects and lack of full acceptance of the program on the part of the State Medical Society, which was apparent to the site visitors. Specific strengths of the program are the leadership; the degree of developed and developing cooperative arrangements among the health care facilities in the Region; and the personal commitment of representatives of many health professions.

The amounts requested were: $2,607,628 first year, and $1,522,601 second year, plus appropriate indirect costs.

1 G03' RM 00025-01, Rochester, New York

The Council recommends approval of $200,857 first year; $149,498 second year; and $155,059 third year, plus appropriate indirect costs for four of the five components. The disapproved project requested support of the clinical application of diagnostic technique which, in the opinion of expert reviewers, is not sufficiently developed for such application.

The amounts requested were: $217,978 first year; $166,619 second year; and $172,210 third year, plus appropriate indirect costs.

1 G03 RM 00038-01R, Washington-Alaska

The Council recommends conditional approval for two years, direct costs of which shall not exceed $969,904 in the first year and an equal amount in the second year, exclusive of nonrecurring costs, to continue allowable activities presented in the application.

The Council concurred in the Review Committee's finding as to the viability of this regional medical program and its readiness to mount an operational program. Final approval of this operational grant request is contingent upon the applicant's submission of an acceptable revised budget to the Division of Regional Medical Programs which reflects projected activities within the intent of the Council's recommendation.

The Council recommends approval of 13 of the 18 projects contained in this application in the amounts indicated above.

The amounts requested were: $1,180,716 first year, and $1,013,144 second year, plus appropriate indirect costs.

Doctor Hogness absented himself.

3 G03 RM 00009-0152, Missouri

The Council recommends disapproval because this appears to be a thinly disguised request for immediate financial assistance for the Kansas City General Hospital with no clearly defined relevance of the request to the goals of Regional Medical Programs.
The support of two projects was requested; however, the Council recommends approval only of project 2, in the amounts of $359,797 for each of three years. Project 2 will establish an endocrine metabolic laboratory as a regional resource for early detection of hypertension, and related services.

Project 1 concerning control of chronic renal disease was disapproved. Although it was agreed that the disease is a "related" one, this particular project is not sufficiently within the purview of Regional Medical Programs at present. It was agreed that if similar projects—primarily for provisions of service to patients with this disease—were supported throughout the Nation, they would require more than the total RMP allocation. The Council also agreed that implementation of any such project should await further assessment of the studies recently reported by PHS and BOB.

The amounts requested were: $684,369 first year, $538,151 second year, and $660,775 third year, plus appropriate indirect costs.

Doctors Millikan and Shanholtz opposed.

XIV. ADJOURNMENT

The meeting was adjourned at 3:00 p.m. on November 21, 1967.

I hereby certify that, to the best of my knowledge, the foregoing minutes and attachment are accurate and complete.
