My dear Mrs. Freeman,

I have just finished signing up my card of registry for service in the war. The University as I understand it has offered its entire equipment and each member of the staff is asked to say what he will do. I have put down—

1. Teaching in the medical school
2. Work in a clinical laboratory
3. Making supplies and drawing
4. Corning—

I put down that I had had
Many as a physician and a charmer and could speak German. Such, I thought, to be sent to Germany as a spy— I said, that I should be afraid that I should tell against the Germans, and the reply was: "I should my need to look. The Hopkins will be made a base hospital, and I think that the laboratory may I use for leading part of the time and for
Making serums and supplies the rest of the time.

I have gotten one thinking that the best is at eight.

One of our men who has just come back from England says that the English have trained so efficiently that they don't need us.

I am enclosing a form by one of the
Most distinguished of the English doctors, a neurologist, which allows to be quite thrilling. He has probably given us one very best analysis of the disease side of the nervous system, and has done a lot of medical work in the past, and this was partly written in one of his days of respite from the tired strain. This makes for New York Lewis has a very fine account for
the medical standpoint of the
heresies and the facts.

A letter from Carla sounds as
if they are really all right
or the. I am sorry that I told you
about Edith—for it appears that
it wasn't any thing serious—
I was myself much surprised
when they had written.

Carla's letter made me
think it was in California to see
the roses if we went camping
such exciting times right there.

The kiwana is a trifle—
It was a great surprise, I
couldn't imagine what the
・・・・・ that I found on thi
Stairs one day, the Americans and Germans don't march right through this summer. What good times I shall have unless the last two lines I read from come true for us. The German retreat is very puzzling - I heard that they might have missed the whole game - but every one has days that it comes to too.

Expression.

Mrs. Herne Pelly has just come here. She says that Baker, the Secretary of War, is an ardent pacifist - and D. was says that he's bankrupt in.

J. H. McC.
So it may be free if he resigns.

Dr. Lundy is going to China with the New Brothers Medical School. He is the Canadian. His aim has been assisting me. I want me to use teaching - to a great advantage for him and me, and all that for him. Our staff will probably be cut down one half next year.

I wish that you were here to hear all the discuss.

About the war -

Very affectionately -

Flora Lohi.
