Memo: To: F.S. Dayt, Chief Nutrition Section
       From: A. Kamberg
       Subject: Fellowship Questionnaire

I would like to make the following suggestions:
A. The questionnaire cannot exceed 2 pages in length.
   About 10 questions plus the "General Evaluation...." page should be adequate. I would submit the following 10 points which I consider among the most important to me:

   Habit of distinguishing
   1. Enthusiasm for research work
   2. Habit of hard work
   3. Imaginative turn of mind
   4. Habit of distinguishing hypothesis from data
   5. Ingenuity in devising techniques to meet needs of a problem
   6. Objective in collecting, evaluation and presentation of data
   7. Judicious use of time-consuming methods of precision
   8. Interest in and understanding of the work
of colleagues.

9. General background in science
10. " " Special branch of science.

b. Delete numerical ratings and the rating of "mediocre". Four categories would be adequate.

c. Encourage comments from the respondent that will expand on questions not adequately answered by a "one word" rating and on matters of importance not considered in the questionnaire.
